BEARINGS FOR THE CEMENT INDUSTRY
As one of the world’s leading manufacturers of rolling bearings, linear technology components and steering systems, we can be found on almost every continent – with production facilities, sales offices and technology centres – because our customers appreciate short decision-making channels, prompt deliveries and local service.

The NSK company

NSK commenced operations as the first Japanese manufacturer of rolling bearings back in 1916. Ever since, we have been continuously expanding and improving not only our product portfolio but also our range of services for various industrial sectors. In this context, we develop technologies in the fields of rolling bearings, linear systems, components for the automotive industry and mechatronic systems. Our research and production facilities in Europe, Americas and Asia are linked together in a global technology network. Here we concentrate not only on the development of new technologies, but also on the continuous optimisation of quality – at every process stage.

Among other things, our research activities include product design, simulation applications using a variety of analytical systems and the development of different steels and lubricants for rolling bearings.
Partnership based on trust – and trust based on quality

Total Quality by NSK: The synergies of our global network of NSK Technology Centres. Just one example of how we meet our requirements for high quality.

NSK is one of the leading companies with a long tradition in patent applications for machine parts. In our worldwide research centres, we not only concentrate on the development of new technologies, but also on the continual improvement of quality based on the integrated technology platform of tribology, material technology, analysis and mechatronics. More about NSK at www.nskeurope.com or call us on +44 (0) 1636 605 123
Leaders in our field, we are not content simply to supply a range of products to meet the needs of today. At NSK we go much further: constantly challenging accepted thinking, exploring new and better methods of design and manufacture and, above all, looking beyond the needs of today to meet customers’ requirements in the future.

Cement is one of the World’s most important building materials – and its production one of the most severe processing environments, and so demands outstanding performance. NSK bearings provide the Cement and related industries with the reliability, sustainability and toughness required to withstand the critical processing factors of water, dust and grit, extreme temperatures, vibration and huge loads. Like other extreme processing and extraction industries, Cement machinery must continuously operate under these challenging conditions. NSK understands your production environments and maintenance issues, and that the solution to sustainable productivity lies in new technology.

As such our bearings are based on proprietary state-of-the-art technology, combined with the experience and knowledge from working with industry leaders. We have designed bearings to ensure your processes continue to run smoothly. NSK bearings exceed the limits of conventional bearings in terms of long operating life and high limiting speed to give you the toughness you require.

**NSK Reliability helping you maintain your production momentum**

NSK bearings offer the Cement industry plant operators and equipment manufacturers longer service life under some of the most challenging operating conditions. Maximising uptime and reducing maintenance costs for improved productivity at Cement plants. Durability and reliability are of paramount importance where failure of a single component can impact the entire Cement manufacturing process. Our superior bearings offer high performance with robust design, helping you improve profitability and productivity.

We continue to deliver the reliability required by Cement plants around the world.

1. Features, Part Name, and Marking by Bearing Type

**Spherical Roller Bearings – HPS™ Series**
- High load capacity
- High limiting speed
- High strength cage (steel or brass)
- Low noise and vibration

**Spherical Roller Bearings – CAM Series**
- Tough machined brass cage
- Self-aligning ability with floating ring guide
- Controlled roller skew
- High dynamic and static load ratings
- High speed performance – low operating temperature rise
- High resistance to heavy & shock loading

**Long-life VS Spherical Roller Bearings**
- Improved surface roughness on rollers, inner & outer ring
- Specifically designed for Vibrating Screens
- Load rating increased by 1.25 times
- Dampened vibration
- Better roller guidance & smooth running
- Reduced bearing damage from slippage, surface fatigue, flaking

**Spherical Roller Bearings – EVB Series**
- Extra capacity vibratory bearings
- Heat stabilised up to 200°C
- One-piece machined brass cage
- Special ring tolerances to withstand vibration, shock loads & misalignment
Cylindrical Roller Bearings – EM Series
› Extra capacity internal design
› High strength brass cage – reduces wear and improves performance in vibrating equipment
› Special cage pocket profiling improves oil / grease flow
› 30% higher load rating than conventional bearings

Cylindrical Roller Bearings – EW Series
› High radial load capacity
› High speed applications
› High strength pressed steel, machined brass or polyamide cage
› Low noise & heat generation

Sealed Deep Groove Ball Bearings
› Viton®* seals (black); Standard seals (brown)
› High temperature Viton®* seals can run up to 200°C
› Standard seals can run up to 120°C
› Low noise level

* DuPont Performance Elastomers LLC

Single Row Deep Groove Ball Bearings – HR Series
› Special internal design
› Bigger rolling elements
› Increased dynamic load rating
› Increased life in operation
› Interchangeable with the standard range
› Extra clean Z steel as standard
Bearing Types

Self-Lube® Units
- Range of diverse casting and pressed steel and thermoplastic housings
- 3 main seal options – standard, triple lip, or flinger/standard
- All cast housings supplied with re-greasing facility
- Secure locking shaft for all speed, load and vibration conditions
- Protector caps available

HLT inserts
- Special internal geometry (cage & internal features) designed to operate at extreme temperatures
- High performance Klüber grease operating at extreme temperatures (-40°C and +180°C)
- Durable silicone rubber seals offer protection at extreme temperatures

Mounted Units
- Sealed single-row ball bearing in a Pillow block or flanged housing
- NSK units feature “flingers” that keep contaminants away
- Housings available in ductile cast iron, cast steel or stainless steel
- Variety of shaft locking mechanisms

Triple Lip Seal
- Nitrile rubber triple lip seals
- Longer life due to superior seal performance
- Extended lubrication intervals – increases productivity of machines and reduces maintenance costs
Plummer Blocks
› Split housing allows easy mounting and dis-mounting
› Various sealing options available – V-ring seals, labyrinth or heavy duty taconite
› Multi lubrication points

Integrated Bearing Assemblies
› Bespoke Housings - High strength SG iron housing
› Vibratory specification bearings:
  50-60% vibration and noise reduction
› Labyrinth & contact seals
› Pre-greased & ready to fit – can be re-greased
› Installation ease & benefits reduce in-house costs

Tapered Roller Bearings
› Inch & metric sizes
› Standard steel / carburised steel / HTF treatment
› Custom-made sets with spacers

Double Row Taper Roller Bearings
› Inch & metric sizes
› Standard steel / carburised steel / HTF treatment
› Also available with heavy-duty seals
Bearing Types

Molded-Oil™ Bearings
› Grease-free property with no oil refilling
› Operating life more than twice as long as grease lubrication (in water/dust contaminated environments)
› Extended maintenance-free performance

TF Series
› Innovative materials
› Special heat treatment technology
› Up to 10 times service life in contaminated lubrication
› Up to 4 times service life at 160°C
› 40% improvement on seizure resistance

Angular Contact Ball Bearings – HPS™ Series
› Optimised internal design
› High strength ball guided cage – available in brass, polyamide or L-PPS
› High running accuracy P5 (ISO Class 5)
› High load ratings
› Universal facing as standard
› 40 degree Contact Angle

Double Row Angular Contact Ball Bearings
› High quality – Ultra clean steel
› Steel or polyamide cage
› Super finished raceways, minimises noise and improves lubricant distribution
› Open or Shielded (ZZ or 2Z)
› Sealed DDU or 2RS
Long-life Pinion shaft with cage & roller assembly
› Compact & Lightweight
› Special heat treatment to shaft & rollers
› Mirror smooth finish on shaft & rollers ensures adequate oil film thickness
› Reduces fatigue flaking and increased contamination resistance
› Improves time between maintenance intervals

Needle Roller Bearings
› Resin (Nylon 46) M type cage & roller assemblies
› High durability even under heavy loads & misaligning operating conditions
› Higher load capacity than conventional machined cages
› Maintains inner cage strength at higher oil temperatures
Incorrectly applied or selected bearings can lead to anything from a reduction in machine performance to failure of an entire system. We support you in solving these technical problems. The value-added programme AIP incorporates a comprehensive service package which enables you to design both productive operation and maintenance processes with increased efficiency and consequently better profitability. With AIP, you reduce your costs at every value-added stage.

**Concentrated knowledge, many years of experience**
Thanks to their in-depth technical knowledge and industry know-how, the experienced NSK application engineers are able to identify profitability potential and recommend appropriate measures. Our experts work according to a procedure which has been tested in practice and standardised – the value cycle. The ideally coordinated solution for your application is developed in close cooperation with them.

**AIP services made to measure**
The comprehensive range of AIP services is purposely designed to enhance efficiency and competitiveness. Your NSK expert will advise you about which measures can be derived from the examination results and will support you in implementing them. An app developed specially by NSK helps to collect data quickly on site and to perform calculations. Another app presents success stories from various branches of industry.

**AIP NSK Solutions**
Example success stories show how profitability and reliability can be increased using tried and tested practices.

**Cost Saver App**
The cost savings calculator app enables potential cost savings to be calculated rapidly.
Discover how you can increase your profitability with the help of our value-added AIP programme and our high-quality products. We will be pleased to send you our complete AIP brochure or contact you personally. Please email your enquiry to us at: aip@nsk.com
